## Example frame 1

This is the first frame.

You can set the blue bar vertical using the option

`\usetheme[verticalbar=true]{tud}`.

Set the aspect ratio to 4:3 with the documentclass option `aspectratio=43`. Use `aspectratio=169` for wide screen (16:9).

- 10 Examples**
- 11 Conclusion

## Example frame 2

### Block

- item 1
- item 2

### Example

- ① Sugar in a stirred cup of tea gathers in the middle.
- ② Rivers often take a detour through flat terrain.

### Alert

Rivers and sweet tea do unexpected things.<sup>1</sup>

## animation

Some commands take optional arguments in the form of <x-y>, where x is the first 'sub-frame' on which the context is shown, and y is the last. x or y can be replaced by +, referring to 'the next sub-frame'.

① uncovered. . .

Using only:1

Using onslide:1

Using pause:
